Skills

Methodologies & Practices: Object Oriented Development, Test Driven Development, Component Driven Development, Unit Testing, Agile Methodologies, Wireframing, Prototyping, Data Analysis, Data Visualization, User-Centered Design, User Research, Design Systems, API Design

Languages & Databases: Javascript, Typescript, HTML, CSS, Swift, Objective-C, C#, Python, Ruby, SQL, MongoDB

Tools & Technologies: Node.js, AWS, Vercel, Heroku, Render, Docker, Figma, Sketch, RabbitMQ, Webpack, ESBuild, Babel, SSR, SEO, Server Component, XCode, iOS, OSX, Cocoapods, Unity, NPM, Yarn, Git, Github, Copilot, ChatGPT, Notion

Frameworks & Libraries: React, React-Native, Redux, MobX, Next.js, Tailwind, Ruby on Rails, D3, MUI, Ant Design, Audiokit, UIKit, CoreData

Work Experience

Full Stack Developer — Copper Labs — Boulder, CO — 03/20 - 04/23

Typescript, Javascript, React, MobX, Redux, Ant Design, React-Native, iOS, Android, Express, PostgreSQL, D3

Copper Labs creates partnerships with utility companies, including Xcel and National Grid, to collect real-time data for demand-side-management

- Led and implemented product strategy to improve hardware discoverability, resulting in a 60% reduction in hardware-related support tickets for Xcel Energy consumers
- Facilitated strategy to continuously ship production quality code in B2B Web Portals and B2C mobile apps
- Successfully managed Pixelspaceto design a user experience that is consistent with Copper's mission and brand identity while optimizing existing and new features across mobile journeys

Full Stack Developer — CareLinx (acquired by Sharecare) — San Bruno, CA — 09/18 - 02/20

Javascript, React, Redux, Next.js, Python, Django, PostgreSQL

- Implemented a successful UX and UI redesign of the family dashboard, resulting in improved matching between families and caregivers
- Collated customer pain points, then designed and shipped a motion design system that optimized the customer onboarding journey

iOS Developer — ReMidi — Torino — 06/17 - 06/18

Swift, UIKit, AudioKit, CoreData, iOS

- Effectively managed relationships with two software contractors and fostered strong collaboration with seamless integration of low-level engine and high-level UI code
- Proactively incorporated user feedback to drive iterative improvements in UX design and responsiveness

Education

Savannah College of Art and Design — B.F.A Sound Design, 2013

Profile

Versatile and resilient software developer. Knowledgeable in the fundamentals of the web. Skilled at coding scalable solutions in various programming paradigms and quick at learning new languages, libraries, and frameworks. Always curious, and known for having a mean air guitar.
